## Methyl Bromide Heat Exchangers

During the past 20 years Great Lakes has sold the Whirl Wind Heat Exchanger to Meth-O-Gas® and Brom-O-Gas® applicators. Unfortunately we can no longer offer this service to our customers.

Our Whirl Wind supplier recently informed us that they will no longer manufacture methyl bromide heat exchangers, citing increased liability as the primary reason for this decision. Therefore, effective immediately, Great Lakes can no longer supply the Whirl Wind heat exchangers.

We are searching for an alternate source for heat exchangers, which is suitable for use with methyl bromide. Until such a source is found, we suggest you contact local machine shops or welding shops regarding their ability to fabricate an exchanger for your needs.

We sincerely apologize for any inconvenience this may cause and ask for your patience while we locate an alternate supplier.
