

FUMIGATION FAX

November 2001

Volume 6, Issue 11

****UPDATE****

Non-manufactured Wood Packing Material to Europe Fumigation with Methyl bromide for Pinewood Nematode (European Union, Commission Decision 2001/219/EC)

Great Lakes received approval from federal EPA in November to add the pinewood nematode as a target pest in the Forest and Plant Product category of Non-food Product Tables of our Meth-O-Gas® 100 and Meth-O-Gas® Q labels. Therefore, a Section 2(ee) under FIFRA is no longer required for these applications. The recommended Dosage Rate for the fumigation of coniferous non-manufactured wood packing material is 3-lb/1000 cubic feet for 24 hours.

The revised label should be posted on the EPA website soon at (<http://oaspub.epa.gov/pestlabl/ppls.home>). To access the label, you will need to enter the product EPA registration number, company and product code. The Great Lakes company number is 5785 and the Meth-O-Gas® 100 code is 11; the Meth-O-Gas® Q code is 41. Select the most current revision date.

EPA has approved an additional change for the Meth-O-Gas® Q label. For this application (and for this application only), you can use Meth-O-Gas® Q without a regulatory agent being physically present at the fumigation site. However, you must be in possession of a document that cites the European Union Commission Decision 2001/219/EC as the reason for performing the quarantine fumigation. If you do not have such a document, please contact your Meth-O-Gas® Q supplier or Great Lakes for an example form.

The fumigation of Non-manufactured Wood Packing Material to Europe Fumigation with Methyl bromide for Pinewood Nematode (European Union, Commission Decision 2001/219/EC is an exempt QUARANTINE fumigation. Please contact your supplier to document this use/treatment on appropriate Quarantine Certification forms.

We are currently notifying the appropriate state agencies of these label changes. If anyone has questions about these changes or use of this product, please contact us at **1-800-378-9451**.

ALWAYS READ AND FOLLOW LABEL DIRECTIONS
